Court Docket and Document System (CDDS)

Title Data has acquired and placed into its Image Library digital images of dockets and associated case documents for many of the civil courts (state district, probate, and county) located in Title Data's Houston-area Title Plants. The dockets and associated case documents comprise a product called the Court Docket and Document System (CDDS). Subscribers to a county's Title Plant are able to view dockets and associated case documents for the courts located in that county. Please note that, where no dates are shown, Title Data continues to work with the court record custodians for those counties to obtain their civil dockets and case documents. Historically, when a title company determines from a search of the Title Plant that a court matter, either pending or closed, may affect title to a parcel of real property or a seller's/buyer's ability to participate in the pending real estate transaction, the title company would ask a courthouse service to locate and e-mail back a copy of the court document or documents which require examination. This meant that the title company could not complete its examination and issue its title insurance commitment until the courthouse service had sent the requested copies, which could take a few hours or a few days. With CDDS, if Title Data has the required case documents loaded in its Image Library, they are immediately available for review, thereby speeding up the completion of the commitment.

NOTES:

¹ May contain gaps where some, but not all of the records can be found. Title Data does not load all case types, as some case types do not affect title to real property (for example, personal injury suits).

² The associated Grantor/Grantee index is available. However, these records are not geographically indexed.
